

KNOW BEFORE YOU GO

2024

SPACE SUMMIT

SNAPSHOT

POTOMAC OFFICERS CLUB

BACKGROUND

An increasing global focus on space has brought about both new opportunities and new threats, and the U.S. government has recognized the need to strengthen its presence in the domain. The nation is now investing heavily in space technology – which offers tremendous benefits for a variety of activities – and zeroing in on the partnerships that empower innovation.

CONTRACT OPPORTUNITIES

The **National Geospatial-Intelligence Agency** recently issued a request for proposals regarding Luno A, a **\$290 million** indefinite-delivery/indefinite-quantity contract. Under the IDIQ, the agency aims to acquire unclassified GEOINT-based computer vision and analytic service capabilities, including object detection and classification, pattern detection, feature mapping and more, from multiple vendors.

The **Air Force Research Laboratory** is accepting solicitations for its **\$250 million** Defense Experimentation Using the Commercial Space Internet contract, under which the AFRL is looking for multi-band, satellite communications antennas. The antennas are required to be capable of communicating with multiple CSI constellations across different orbital regimes and would be used on military aircraft.

NASA released a draft request for proposals for the upcoming **\$212.6 million** MSFC Logistics Support Services II contract. Specific responsibilities will cover the areas of equipment management; life cycle logistics and supply chain management; and supply and materials management operations, among others.

NETWORKING OPPORTUNITIES

OVER 110 COMPANIES WILL BE ATTENDING THE EVENT.

OF REGISTERED ATTENDEES...

20%
are C-suite
leaders

20%
are business
development execs

22%
